RLAP Data Usage Agreement

The RLAP dataset contains 58 student participants and 3.24M frames of available video, with all BVP signals synchronously recorded. The dataset is designed for studying spontaneous emotional expression, learning engagement, and remote physiological sensing. This dataset is suitable for training remote physiological sensing models; for details, please refer to the Repo:

https://github.com/KegangWangCCNU/RLAP-dataset

Once you use the RLAP dataset, you are considered to comply with the following regulations:

1. Use the dataset for academic purposes only, commercial use is prohibited
2. No secondary distribution unless permission is obtained from the dataset owner
3. Follow academic code, reference paper https://arxiv.org/abs/2305.04161

If you agree to the above terms, please sign below. Only signatures from faculty and staff are accepted.
